No. 416
Enclosure No. Two.

DEPUTY COMMISSIONER'S OF
MYSORE DISTRICT.
Dated Mysore 31st October 1

To

The Secretary to the Government of Mysore,
Revenue and General Departments.

SIR,

I have the honor to state that the Municipal Board of Nanjangud recommend the introduction of the levy of octroi duty on jaggery and kerosine oil imported into the town for consumption at the rate of one anna per maund of jaggery and of two annas per box or one anna on every Tin of kerosine oil. The total income from the two items is estimated at Rs. 1,650 a year as exhibited in the statement herewith submitted. The levy is considered to be necessary in the interest of the Nanjangud Municipality inasmuch as the town requires improvement in sanitation by opening out the congested parts and providing the whole town with good

good drainage. A copy of the Inspection Notes of Mr. Arunagam Mudaliar is herewith submitted for perusal of Government. The Municipality has now an outstanding debt of nearly Rs 10,000 which is shortly to be increased by Rs. 3,000, the moiety of the cost of the Storage Reservoir under construction. Since the Municipality with its present annual estimated income of Rs. 6,500 and an expenditure of Rs. 5,500 under fixed charges alone, is hardly able to effect any sanitary improvements, the resources of the same require to be augmented so far as possible. Therefore I request that you will be good enough to place the whole matter before Government with to obtain their sanction for levying the octroi duty on the said articles of Jaggery and Kerosine oil at the rates proposed.

I have the honour to be
Sir
Your most obedient humble
servant

Extract from the Inspection notes of Dr. Arunachalam Mudaliar.

* * *

All the houses situated on the left bank of the Gundal river in the Halladakere and Tammadahere of Ranjangud ought to be dismantled and the owners of these houses provided with house sites in the paggi fields to the south of Ranjangud Hura road.

Kurubar Kere and Boiter ker require opening up by broad parallel roads, running at right angles to the main road in Ranjangud.

The drains on the main street at Ranjangud are badly constructed water stagnates in several parts and the drains are silted up to height of 6 to 9 inches.
